

What you need to know about your concrete project...

What you need to know about the process:

- **Estimates** - We work to get most estimates back within 2 working days so you can review items quickly.
 - **Scheduling** - When you are ready to move forward with your project, most can be scheduled within 2-3 weeks
 - **Warranty** - We provide a 1-Year Structural Crack Warranty
 - **Project Management** - The person who did your estimate will likely be the one fully devoted to your project making daily visits to ensure your project is completed correctly.
 - **Protection** - Prior to your project we locate all utilities, handle all permits, cover valuables with plastic, use plywood to prevent as much yard damage as possible along with using the best practices to leave your property better than we found it.
 - **Maintenance** - Patios and Driveways done right require next to minimal maintenance over time other than new sealer applied every 3-7 years. We will put you on the automated list to make sure you hit these marks to maintain a great concrete product.
-

What you need to know about your final Concrete Product:

- **Prep Work** - Replacing the old, ineffective sub-grade with new compacted rock creates the critical stability and drainage to support the new driveway
 - **Rebar** - Setting 3/8" thick rebar in a 2' by 2' grid creates more overall stability and resistance to cracking via normal movement.
 - **Precision Grade** - We use laser analysis to ensure the driveway drains in proper directions every time.
 - **Concrete Mix** - We mix all concrete material on-site in order to hit the highest strength possible along with a clean, consistent look. We are the ONLY company in town that has our own concrete mixers for this reason.
 - **Concrete Sealer** - This DOT approved sealer protects your driveway from moisture along with other corrosive materials and oil products.
 - **Experience** - Our crew leaders have been with us for nearly a decade and they take pride in their work and are some of the most skilled around. High Quality Concrete isn't simple but their skill and attention to detail makes it look easy.
-

What makes I-80 Concrete different:

- **Final Product** - 120+ 5-Star Reviews from customers - over 800 patios and driveways completed in the Des Moines Metro in the last 5 years
